(54) Title: METHOD AND APPARATUS FOR WIRELESS INTERSYSTEM HANDOVER

(57) Abstract: A method and apparatus for measurement event
synchronisation of a portable radio communication apparatus
(100) providing multiple radio access technologies, wherein
an idle gap is identified between transceiver activities of a first
radio access technology device (103) (410), and an execute
signal is sent to a second radio access technology device (101)
for initiating inter radio access technology measurements of the
second radio access technology device (101), to be performed
during the gap (402, 402c, 403).
